[Time: 2 ½ Hours] [Marks:75]

Please check whether you have got the right question paper.

- N.B: 1. All questions are compulsory.
 - 2. Figures to the right indicate full marks.
 - 3. Use of non-programmable calculator is allowed and mobile phones are not allowed.
 - 4. Normal distribution table is printed on the last page for reference.
 - 5. Support your answers with diagrams/illustrations, wherever necessary.
 - 6. Graph paper will be supplied on request.

Q.1 Attempt any two from the following:

a. Solve by simplex method

Max Z =
$$8 x_1 + 20x_2$$

subject to:

$$2x_1 + x_2 \le 80...$$
 Resource I $3x_1 + 4x_2 \le 96...$ Resource II

$$(X_1, X_2) \ge 0$$

Find optional profit (Max Z)

b. ABC Ltd. manufactures two products P and Q. Profit per unit for P and Q is Rs 40 and Rs 80 respectively. 7.5 One unit of P requires 2 machines hours and one unit of Q requires 3 machines hours. Availability of machine hours is 48.

Maximum market demand for P is 15 units and for Q is 10 units. Formulate as LPP and solve by graphical method to obtain maximum total Profit.

- c. Answer the following:
 - Explain the use of slack, surplus and artificial variables in simplex method.
 2.5
 - ii) Explain what is redundant constraint in graphical solution with the help of a neat sketch. 2.5
 - iii) Explain the different types of constraints in LPP. 2.5
- Q.2 Attempt any two from the following:
 - a. A company has three factories F₁, F₂ and F₃ with supply of 800, 600 and 1000 units respectively. There are four warehouses W₁, W₂, W₃ and W₄ with demand of 400, 500, 700 and 800 units respectively. A feasible solution is given below. (With allocations and unit cost data).
 - i. Test the solution for optimality using modified distribution method.
 - ii. If the solution is not optimal, find optimal solution by modifying it. 3.5
 - iii. Find minimum transportation cost.

From	W1	W2	W3	W4	Supply
F1	300 12	500 6	20	25	800
F2	100	§ <u>11</u>	500	12	600
F3	<u> 9</u>	15	200	800	1000
Demand	400	500	700	800	2400

Q.P. Code: 01856

b. There are four machines M₁, M₂, M₃ and M₄. There are five jobs P, Q, R, S and T. Cost of doing each job on each machine is given below (in Rs. hundreds). Machine M₂ cannot process Job R and Machine M₃ cannot process Job P. Find optional assignment of machines and jobs to minimize total cost.

			20,		
Jobs	Р	Q	R	s	Ť
M ₁	9	11	15	10	11
M ₂	12	9	\$45 - 564	10	9 9
M ₃	8 .5 8	11	14	11	7 7 8 8 3
M ₄	14	8 5	12	7	8

c. Answer the following:

- Explain the steps involved in solution of an unbalanced maximization assignment problem.
- Explain what is meant by degeneracy in a transportation problem and how to resolve it.
- Explain why Vogel's approximation method (VAM) is a better method than North West corner rule (NWCR) to find initial feasible solution of a transportation problem.

Q.3 Attempt any two from the following:

a. A small project consists of following activities

Activity	Preceding activity	Time (days)
A	06882368	4
A B	9243333	5 5 5
B C S	8886 8 8869	7.6
Do	A	6
8 1 E 8 1	В	S S S S 7
\$ & F & S	Post C	6
G	D	5 5
H	E	8
\$ 2 M & 2 2	25 8 8 8 5 6 6 6	5

- i. Draw network diagram and find critical path and project completion tine.
- ii. Find earliest and latest starting and finishing times of all activities (EST, EFT, LST, LFT).

b. Three time estimates are given for each activity of following project.

Activity	Optimistic (a)	Most likely (m)	Pessimistic (b)
1-2	6 9 9 8	6	24
1-3	86,566,66	12	18
1-4	12 3 6	12	30
2-5	63 63 63	6	6
3-5	12	30	48
4-6	12	30	42
5-6	9 8 8 8 18	30	54

- Tabulate expected time (te) and variance of all activities.
- ii) Draw network diagram and find total project completion time (Critical path).
- iii) What will be project completion for 90% confidence of completion?

c. Answer the following:

i)	Explain difference between CPM and PERT.	886288888888	2.5
ii)	Explain what is time cost trade off in project crashing.	\$ \$ \$ \$ \$ \$ \$ \$ \$ \$ \$ \$ \$ \$ \$ \$ \$ \$ \$	2.5
iii)	What are the objectives of project crashing?	234 252 252	2.5

Q.4 Attempt any two from the following:

a. Four strategic alternatives S_1 , S_2 , S_3 and S_4 are available for countering four states of nature N_1 , N_2 , N_3 and N_4

States of nature							
	N ₁	N ₂	N ₃	N_4			
Probability	0.2	0.1000	0.3	0.4			
Strategy S ₁	1200	1200	1200	1200			
Strategy S ₂	1040	1280	1280	1280			
Strategy S₃	880	1080	1360	1360			
Strategy S ₄	700	840	1080	1440			

Based on the above information:

- Calculate EMV (expected monetary value) for each strategy and find optimal decision.
- ii) Find EPPI (expected payoff with perfect information) and EVPI (expected value of perfect information).
- iii) Construct regret table and calculate EOL (expected opportunity loss).
- Following payoff matrix refers to a two player game, player A and player B. Each player has four strategic options.

- i. Find the Maximin Strategy.
- ii. Find the Minimax Strategy.
- iii. What is the value of the Game?
- c. Five jobs I, II III IV and V are to be processed on two machines A and B in the order AB.

Processing time (minutes)							
Job	Machine A	Machine B					
8 5 1 1 3 6 8 8	90	70					
384888	40	80					
8 8 MIR & 5	40	50					
S SIVE S	30	10					
88 V 8	25	35					

- i. Find optimal sequence of jobs.
- Find total minimum elapsed time.
- iii. Find idle time for each machine.

Q.5 A company produces two products A and B. Profit per unit for A and B is Rs 30 and Rs 50 respectively. Three resources M₁, M₂ and M₃ are utilized. Capacities of M₁, M₂ and M₃ are 4, 6 and 12 hours respectively. Following feasible solution has been obtained by simplex method. Based on the solution answer the following questions.

C _i →₃		30	50	0	0	0	130,0
С	Х	X ₁	X ₂	S ₁	S ₂	S ₃	Bi
0	S ₁	1	0	1.00	0.0	S 0 3	4
0	S ₂	$-3/_{2}$	0	0 💎	1	-1/2	0
50	X ₂	3/2	1	80	0	1/2	6
Z		75	50	0	0	25	300

i.	Is this optimal solutions? Justify.	02
ii.	What is optimal product mix and optimal profit?	02
iii.	Is there degeneracy in the solution? Justify.	02
iv.	Is it unique solution or are there multiple optimal solution? Justify.	02
v.	What are the shadow prices of M ₁ , M ₂ and M ₃ ?	03
vi.	Which resources are scarce and which are abundant?	02
vii.	Find percentage utilization of M ₁ and M ₂ .	02
