**Q4) Answer any three of the following:- (15)**

- A) Comprehension. Read the following and write the correct answers given below.

Dolphins are regarded as the friendliest creatures in the sea and stories of them helping drowning sailors have been common since Roman times. The more we learn about dolphins, the more we realize that their society is more complex than people previously imagined. They look after other dolphins when they are ill, care for pregnant mothers and protect the weakest in the community, as we do. Some scientists have suggested that dolphins have a language but it is much more probable that they communicate with each other without needing words. Could any of these mammals be more intelligent than man? Certainly the most common argument in favor of man's superiority over them that we can kill them more easily than they can kill us is the least satisfactory. On the contrary, the more we discover about these remarkable creatures, the less we appear superior when we destroy them.

ANSWER THE FOLLOWING QUESTIONS:

1. What is the reputation of Dolphins and man relation?(1MARK)
2. Who has suggested that Dolphins have a language?(1MARK)
3. Name 2 characteristics of dolphins suggesting complex society.(2MARK)
4. Give a name to the passage.(1MARK)

B) Precis writing.

Read the following passage and rewrite in 52 words.

Passage ..... A drop of water fell out of the cloud into the sea, and finding itself lost in such an immensity of fluid matter, broke out into the following reflection: 'Alas! What an inconsiderable creature am I in this prodigious ocean of waters: My existence is of no concern in the universe; 'I am reduced to a kind of nothing, and am the least of the works of God'. It so happened that an oyster which lay in the neighbourhood of this drop chanced to gape and swallow it up in the midst of this his soliloquy. The drop, say the fables, lay a great while hardening in the shell, until by degrees it was ripened into a pearl, falling into the hands of a diver, after a long series of adventures, is at present that famous pearl which is fixed on the top of the Persian diadem.
